(+44) 7412 814371

## Personal Profile

**A hard working A-Level student with keen interest in web design & development.** After learning the basics of graphic design software in school, over the past five years I have expanded my knowledge of graphic design and web development through self-study, and am now keen to gain some experience in a real workplace.

## Work Experience

### 2018

- Allergy Asthma and Sinus Centers inc.

*Website design, website development, business cards and other collateral.*

On this project, I gained an understanding of how to find other designers to work with and how to effectively communicate design briefs to them. I also learnt how to effectively work within tight budgets. In addition, I am still gaining a deeper insight about website design by revisiting analytics data and refactoring the design based on this.

- [www.immarisaa.com](http://www.immarisaa.com).

*WordPress theme and logo.*

Made for lifestyle & beauty blogger Marissa Ibrahim, this was a simple WordPress theme and logo which aimed to give a sense of professionalism and authority to her blog articles.

### 2017

- Urdu Media Monitor

*Visual identity design.*

On this project, I learnt more about the technicalities of drawing letterforms and re-drawing them digitally.

- SmartMeterUAE.

*Website design, logo design, website development.*

On this project, I learnt about using open source frameworks and libraries to develop more efficiently. I also learnt how to negotiate pricing.

## 2016

- **Rackspace**

*Two week work experience placement.*

I shadowed the employees and saw them receiving calls, taking details of and solving problems. This experience exposed me to a working environment and helped me learn about team work, respecting colleagues and being flexible in my approach.

## Education

### 2017-Current

Camden School for Girls Sixth Form

Currently studying Economics, Further Mathematics, Mathematics, and Physics.

### 2012-2017
